

**18TH MARCH, 5PM
KEKERENGU HALL**

YOU ARE WELCOME TO A POST QUAKE FARMING 'TELLING OUR STORIES' WORKSHOP

**This will be an opportunity to share your stories for
the Clarence/Ward community repository**

This workshop is part of the wider PQF 'Telling our Stories' Clarence/Ward project which will record the earthquake and farming stories of the district for storage in an online repository as a resource for the community.

This is an opportunity for you to share stories; whether we have interviewed you or a family member in the last few months, or stories we have yet to hear.

We will present the interim results from completed interviews and we are looking to supplement these stories with your photographs, extracts from your family heritage books, or other resources.

The result will be a community repository which can be used in the future, including displays in the planned heritage centre in Ward, interpretative signage or in tour information.

There will also be a brief update on the PQF Project and what you would like to get out of our extension programme this coming autumn.

**Share your stories
with us**

**Bring your photos,
mementoes, family
heritage books**

Food provided

**TO RSVP, OR IF YOU HAVE
ANY QUESTIONS**
